

2020 Quarantine Photos and Videos

RTMS 7th Grade—The Class of 2025

Ishanvi S.

During quarantine and overall, I have been doing a lot of crafting and baking. For crafting I have sewed and made bracelets, as shown below; and I have done lots of baking, but I have included one in the email. I bake many different foods, like muffins, breads, and other desserts.

Temi O.

What I been doing during quarantine is nothing but not too long ago I help her install a new fan.

In the time of COVID-19, I am doing lots of math, art drawing, and I have been playing my instrument [Rohan]

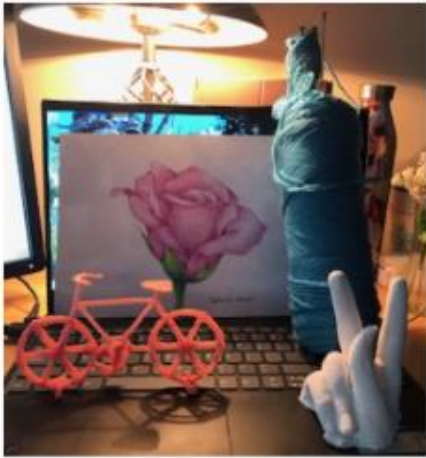

We solve a lot of puzzles in my family and once they are completed, we Mod Podge the puzzle, glue it to a poster board, and hang it up somewhere (if there's any space remaining on the walls). Here is a 1000 piece puzzle we completed during quarantine. Also, my dad messed up a little during the Mod Podge/gluing process and there are white patches and streaks around the puzzle that don't belong there, from newspapers.

Sophia and Sasara

During quarantine, I had a lot of time on my hands. I spent this time playing with my 3D pen and I created a bicycle. I also started knitting and I drew and colored a rose. When I was clearing out my bedroom, I found this molding kit, so I decided to use it. Besides that, I picked up another sport for fun which is badminton.

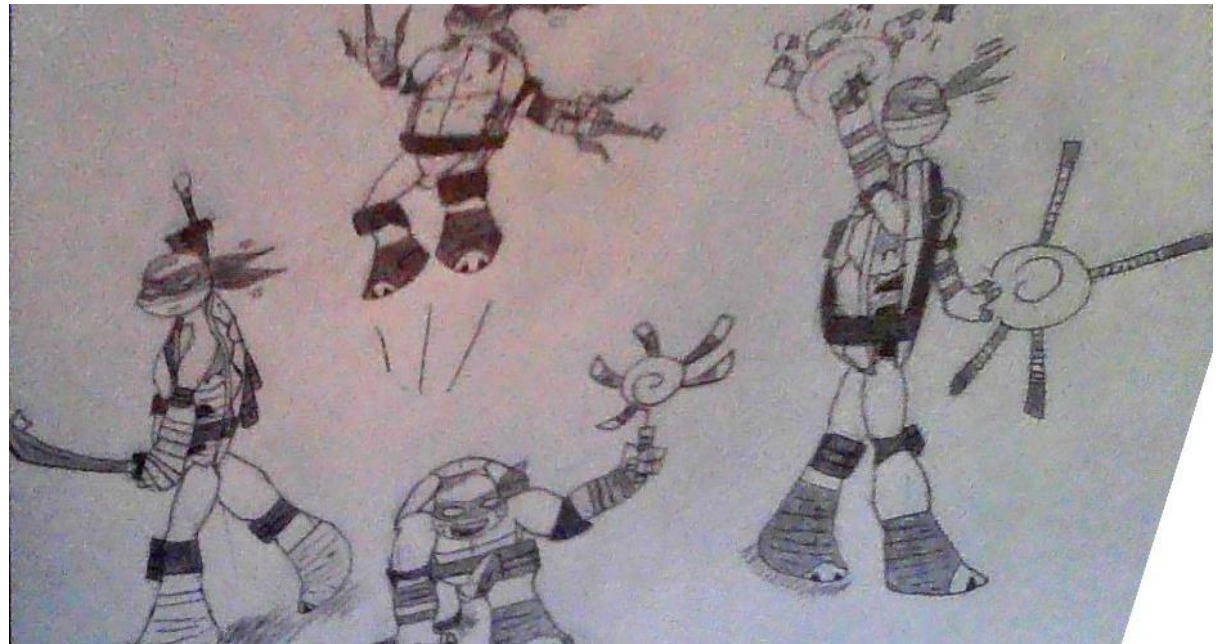

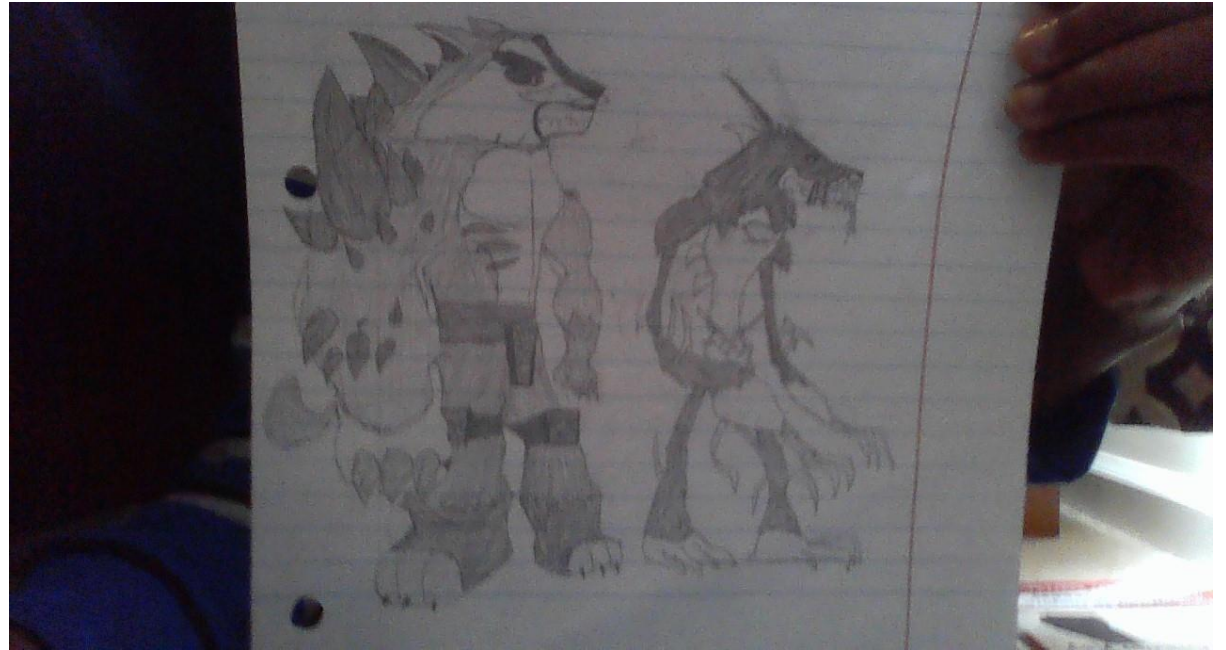

— Sophia Li

Sasara made green tea cake and homemade cards!

David O.

Piper E.

I set up my slip and slide in my back yard.

My sister and I went through old family photos and saw baby pictures of me.

We baked Banana bread.

We decorated cupcakes for Easter

I made a cake. I sewed a dress, a skirt, and a mask. I made a tiny, foldable, paper house. And I did a lot of reading. --Anvitha

Sarah B.

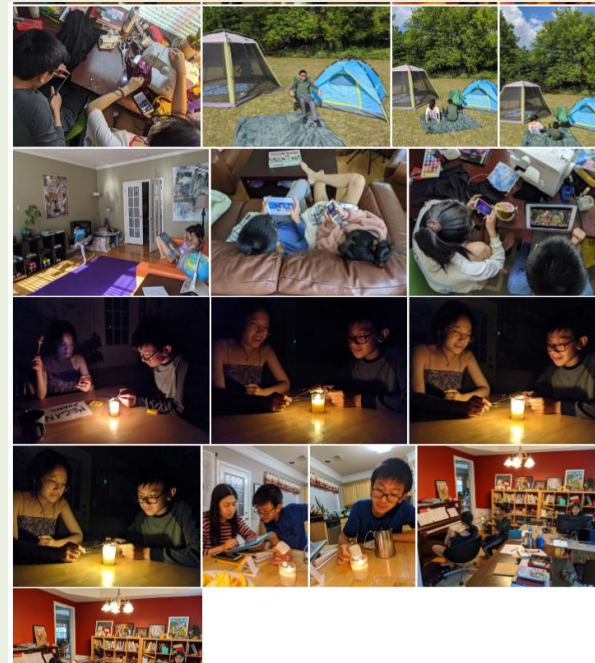

Rebecca, Bryant, Andrew

During the pandemic, I have been at home doing lots of fun activities. I have enjoyed feasting on food many times a day, while watching tv for the rest of the time. On the weekdays, however, I did schoolwork first and then played video games and enjoyed my own activities. Although I really enjoy this time, I would really like to go back to school and have fun with my friends again. --Andrew L.

The collage consists of 12 individual photographs arranged in a 3x4 grid. The top row shows the family in a kitchen, at a study desk, and playing basketball outdoors. The middle row shows them on a driveway basketball court, relaxing on a couch, and camping in a tent. The bottom row shows them playing board games on a coffee table in a living room setting, with different camera angles and groupings of family members.
